# Introduction

## DEFINITION & HISTORY

Presentations are communication tools that can be demonstrations, lectures, speeches, reports, and more. Most of the time, they're presented before an audience. They have a variety of purposes, making them powerful tools for convincing and teaching.

If you'd like to add more content to your presentation, there are plenty of options. You can include photos of your team, descriptions of products, or your goals as a company. It all depends on the purpose of your presentation, and how you plan on laying out your details.
